WEB PAGE

- In case of an additional or increased rash, hives, breathing difficulties, dizziness, swelling of the lips, tongue, face or eyes, or any other rapidly evolving difficulty, do contact your doctor **IMMEDIATELY!**

→ contact your drugstore if needed:

→ **INFORMATION:**

- Julian actually has a "Group A Beta Hemolytic Streptococci" infection, or "Strep Throat", a common infection in children. Because he has also a typical rash as well, he has in fact a form of "Scarlet Fever". For detailed information from selected sources of medical information, go to zero-search™.

AUGMENTIN®
